Evolution of Diving in support of Offshore Energy

Andy Butler
Diving Technical Authority &
Lead - Regulatory | Onefleet
TechnipFMC

Andy will dive into the world of commercial diving explaining different aspects of the history and evolution of diving. Covering key elements such as diving physiology, diving methods, and last but not least diving governance as an important factor to get all divers safely back to the surface. An interesting session for the uneducated to better understand how human beings are able to work 300 m safely below the surface.

Tickets booked less than 24 hours before the event or at the door will incur a £5 supplement charge

No student rate at the door

March 22nd
