

Call for Abstracts – Deadline 25 October 2024

As the UK's geothermal sector gains momentum, with pioneering projects emerging across the country, SPE Aberdeen proudly announces its Geothermal Seminar 2025. This pivotal event comes at a time when the UK government has reinforced its commitment to low carbon and renewable energy, with recent funding initiatives aimed at accelerating development and the creation of UK Energy.

Now in its fourth year, the seminar serves as a platform to share knowledge and showcase groundbreaking research and real-world applications that are shaping the future of sustainable energy.

We invite professionals across the sector – including geothermal experts, researchers, policymakers, financiers, innovators and enthusiasts – to submit abstracts that capture the innovative spirit driving geothermal advancements.

Join us in February 2025 to explore how geothermal energy is evolving from a promising concept to a key component of the UK's clean energy strategy.

We are now accepting abstract submissions for the upcoming seminar. The technical committee welcomes proposals for either a 20-minute full presentation or a concise 5-minute “Techbyte” talk.

Abstracts should be approximately 200 words in length. Please note that formal SPE papers are not required for participation.

For further information, visit www.spe-aberdeen.org or contact us on aberdeen.events@spe-uk.org.

For this year’s event, we are particularly interested in abstracts addressing the following themes:

Policy, Regulations & Funding

- Government support and incentives.
- Licensing and policy updates.
- Funding sources and commercial models.

Market Outlook & International Perspectives

- UK and European market trends.
- International comparatives: Global geothermal initiatives.
- Investment landscapes and project updates.

Geothermal Applications & Case Studies

- Power generation: Onsite production and grid integration.
- Direct use applications: Heating and cooling solutions.
- UK North Sea focus: Repurposing existing infrastructure.
- Urban geothermal solutions: District heating and data centres.

Technological Advancements

- Breakthrough technologies and future innovations.
- Digital twin modelling and resource evaluation.
- Flow assurance challenges and solutions.
- Closed-loop systems: Viability and innovations.

Geothermal+ : Synergies and Added Value

- Geothermal and CCUS integration
- Lithium and mineral extraction from geothermal brines.
- Geothermal-powered hydrogen production
- Energy transfer optimisations.

Operational Insights

- High enthalpy field production experiences.
- Lessons learned: Analysis and mitigations.
- Multi-stage stimulation techniques.

Sponsorship Opportunities

SPE Aberdeen is a not-for-profit organisation and raising sponsorship is vital not only for the successful delivery of the conference but to enable re-investment back into the industry.

By supporting this event, not only are you providing an important knowledge sharing and training opportunity for the industry, but you are also supporting the future generation and the future of our industry.

All sponsors will receive the following benefits:

- Logo on all materials incl. web, abstracts flyer, programme flyer, social media.
- Corporate branding on conference slides.
- Profile and logo in abstracts book.
- Recognition by conference chair throughout the event.
- Access to delegate list prior to the event.

To enquire about sponsorship packages, please contact aberdeen.events@spe-uk.org or call 01224 646311.

Package specific benefits:

Platinum Sponsor **£3,600**

- Prime positioning of logo on materials.
- Social media input – provide content for a post prior to the event.
- Video opportunity – provide a video to play during the break.
- 5 x delegate passes included plus 3 x tickets for the networking event.
