

Call for Abstracts – Deadline Friday 14th October

After the success of the inaugural event in 2022, SPE Aberdeen’s Geothermal Seminar will return in February 2023. Building on the content of the last event and the opportunity it provided to explore the role of geothermal in the energy transition, this year’s event will delve deeper into realising the ambitions of the sector.

The Seminar will feature a combination of case studies, panel sessions, and technologies and will be relevant to a broad range of people from energy professionals, thought leaders, those looking to transition, to those just eager to learn more.

The call for abstracts is now open and will close on 14th October 2022.

The conference committee are inviting potential speakers to submit a 200-word abstract to be considered for either a 20-minute presentation or a 5-minute “Techbyte” presentation.

Please submit your abstract by emailing it to geothermal@spe-uk.org

This year we are looking for abstracts that cover a broad range of themes including, but not limited to:

- Overview, market assessment, what does Geothermal look like now and what’s the vision for the future?
- The skills required to transition into the new ‘Net Zero’ world
- Heat Networks
- Closed loops/deep closed loops
- Drilling and completions
- Geothermal gone wrong – learning from past experiences in order to improve and advance the industry
- Investment and risk mitigation
- Barriers to financing and potential solutions
- What’s hot in geothermal innovation? Technology and industry enablers.
- What can we learn from other sectors to help advance Geothermal?
- Economics and policy
- Energy Security
- Repurposing oil and gas wells for Geothermal Energy exploitation
- Case studies from operators and service companies

If you have experiences to share, then we would like to invite you to submit your 200-word abstract for consideration for the 2023 conference programme.

We are interested in hearing about your case studies and lessons learned, innovative technologies, and experiences within Geothermal. The aim of this event is to share knowledge and advance the industry as we work towards the Energy Transition.

Programme Sponsor

Sponsorship Opportunities

We are looking for partners to support the event and there are several packages available. As SPE are a not-for-profit organisation, any surplus made on their events are reinvested back into various initiatives to help support our future generation of young engineers.

We also have video showcase opportunities available at a cost of £500 + VAT.

For more detail on any of the packages listed, please contact leanne.sinclair@mearns-gill.com or call 01224 646311.

Book your place

To book your place to attend this virtual event, visit www.spe-aberdeen.org or contact geothermal@spe-uk.org
