Two days of presentations and Techbytes - stay up to date with the continually changing energy industry technologies and methodologies.

Great networking opportunity

>400 attendees across the two days with a high operator presence

Money raised re-invested into local STEM programmes

Cost effective training opportunity

## TECHNICAL PROGRAMME

Seismic 2023 continues to develop the themes explored at the 2022 event, covering the energy lifecycle from exploration through appraisal, development, and production to decommissioning and repurposing. The event will build on how seismic sustainably supports the UK's energy security of supply and Net Zero obligations, and will cover hydrocarbons, renewables, geothermal, and carbon storage.

### WHO SHOULD ATTEND?

Seismic 2023 is not only relevant to Geoscientists and Geophysicists, but also those in non-geo related roles, such as Petroleum Engineers and senior decision makers in operating and service companies.
