Two days of presentations and Techbytes - stay up to date with the continually changing energy industry technologies and methodologies.

Great networking opportunity

>400 attendees across the two days with a high operator presence

Money raised re-invested into local STEM programmes

Cost effective training opportunity

Dedicated early career session

TECHNICAL PROGRAMME

Seismic 2024 is the leading event of its kind and the only one in Aberdeen to focus exclusively on seismic and geophysics over its two days of technical talks.

The conference will cover the role of geophysics in the energy lifecycle from exploration, appraisal, development and production through to decommissioning and repurposing, and will explore how seismic sustainably supports the UK's energy security and Net Zero obligations.

WHO SHOULD ATTEND?

Seismic 2024 is not only relevant to Geoscientists and Geophysicists, but also those in non-geo related roles, such as Petroleum Engineers and senior decision makers in operating and service companies.

We invite early career through to experienced professionals to attend, and also welcome those still in further education.
