

DRIVING VALUE IN LATE LIFE ASSET OPERATIONS

Are you ready to shape the future of offshore energy? Topsides UK 2025 is calling on industry professionals to share insights, innovations, and real-world experiences that will drive efficiency, safety, and sustainability across North Sea assets.

Our annual conference isn't just about discussions, it's about action.

It's about tackling the challenges that stand in the way of failure-free operations, advancing emissions reduction strategies, and extending the life of offshore infrastructure. This year, we're putting a sharp focus on three crucial pillars: Energy Security, Emissions Reduction, and Late-Life Asset Management.

As offshore assets continue to operate under mounting pressures - economic, regulatory, and environmental, Topsides UK 2025 is the platform to connect, collaborate, and contribute to the evolution of offshore operations.
