

SPE ICoTA 23rd European Well Intervention Conference

Organisers

Unlocking our potential – innovation and collaboration to maximise recovery

15-16 November 2017
AECC

The 23rd SPE ICoTA Well Intervention Conference is the largest and longest established conference of its kind in Europe. This year, we will address 'more for less' and discuss how we can truly unlock our potential through innovation and collaboration to maximise recovery.

If you're engaged in any wells discipline, you can't afford to miss the valuable training, learning and networking opportunities provided at this conference. Attendance will count towards your CPD points.

This year's programme features an incredible line up of top industry speakers, with excellent examples of collaboration, cost savings and innovative use of technology. We are delighted that Colette Cohen, Chief Executive of the Oil and Gas Technology Centre will open the 2017 Conference.

Raise your profile

Take advantage of the high profile sponsorship and exhibitor opportunities available. This year, we have had to extend the exhibition space due to demand and only a few spaces remain.

For an up to date floor plan, contact icota@mearns-gill.com or contact the Events Team on 01224 646311.

Pre-conference short course 14 November, AECC Effective Learning from incidents

This CPD accredited interactive workshop aims to demonstrate what is achievable by analysing incident investigation data and using the information as a very effective and highly interactive means of learning. The exercises in this workshop can show what is possible for IWCF Level 5 and enhanced programme case studies.

SPE ICoTA 23RD EUROPEAN WELL INTERVENTION CONFERENCE PROGRAMME

DAY 1 - WEDNESDAY 15TH NOVEMBER

| | |
|-------|--|
| 07:30 | REGISTRATION - BREAKFAST & NETWORKING IN BOYD ORR EXHIBITION HALL / CONFERENCE - CROMBIE SUITE |
| 08:30 | WELCOME & INTRODUCTION - Steve Cromar, SPE ICoTA Conference Chair |
| 08:40 | KEYNOTE ADDRESS - The Oil and Gas Technology Centre - Colette Cohen, Chief Executive Officer |
| 09:05 | The Importance of Interventions in Ultra-Late Life - Ian Jackson, Shell U.K. Ltd |
| 09:30 | Persistence Pays off with Subsea Water Shut off on Kinnoull Field - Naomi Milne, BP |
| 09:55 | Altus Intervention And Weatherford International Collaborate To Provide A Large Bore Coiled Tubing And Packer Straddle System for Water Shut-Off In A North Sea Well - Donald Kellock, Altus Intervention |
| 10:20 | REFRESHMENTS AND NETWORKING IN BOYD ORR EXHIBITION HALL |
| 10:50 | Forget 9 till 5, it's 5 till 9 we need to be concerned about - George Galloway, IWCF |
| 11:15 | Electric Line Deployed Expander Tool Provides In-well Repair of Damaged Completion Components, Enabling Subsequent Intervention and Production Reinstatement of Shut in Wells - Anders Groenroed, Altus Intervention |
| 11:40 | Cement Paker Application to restore production in depleted reservoir in Italy - Danilo Appicciutoli, Halliburton |
| 12:05 | TECHNOLOGY SHOWCASE: Downhole Cameras Providing Streetview for your Wellbore on Coiled Tubing - David Clover, Vision IO CoilHose well intervention technology - Jostein Alvaern, Quality Intervention A New Approach to the Deployment of Fiber Optics - Paul Higginson, Well-SENSE Verification of barriers in an abandonment phase - Tommy Bruce, Interwell The power of thermite, metal-to-metal sealant; a disruptive approach to standard well sealing activity - Paul Carragher, BiSN Oil Tools |
| 12:30 | ICoTA Innovation Award presented by Steve Moir, Chair of ICoTA Europe |
| 12:45 | LUNCH & NETWORKING IN BOYD ORR EXHIBITION HALL |
| 13:45 | Viking BD Casing Recovery - Tom Jenkins, ConocoPhillips |
| 14:10 | Successful Creation of Permanent Reservoir Isolation Barriers Using Coiled Tubing on the Norwegian Continental Shelf - Iain Thomson, Halliburton |
| 14:35 | HWO - Production Recovery - Andy Black, WellGear |
| 15:00 | Tunisia Miskar A-16 Production Enhancement Project - Ben Talbot, Shell U.K. Ltd |
| 13:45 | Subsea Well Abandonments – Shell Everest 2016 Case History, Shell U.K. Ltd |
| 14:10 | REFRESHMENTS AND NETWORKING IN BOYD ORR EXHIBITION HALL |
| 15:55 | Transforming Conventional CT Unit to Coiled Tubing Drilling Rig - Afendi Yusoff, Schlumberger |
| 16:20 | Breakthrough Adjustable Scale Milling bit technology - Nelo Aracena, Welltec |
| 16:45 | Well Intervention Frames - A Step Change in Safety, Efficiency & Cost Effectiveness - Tim Eley, OSBIT |
| 17:10 | JIP between Shell, Maersk and CannSeal, successfully seal of a gas leaking cemented micro annulus using the CannSeal tool - Bengt Gunnarsson, CannSeal |
| 17:35 | CLOSING REMARKS |

DAY 2 - THURSDAY 16TH NOVEMBER

| | |
|-------|--|
| 08:00 | REGISTRATION - BREAKFAST & NETWORKING IN BOYD ORR EXHIBITION HALL / CONFERENCE - CROMBIE SUITE |
| 09:00 | WELCOME & INTRODUCTION - Steve Cromar, SPE ICoTA Conference Chair |
| 09:05 | Impact of salt deposition on UKCS production losses, what can we do about it? - Eric Marston, Oil and Gas Authority |
| 09:30 | Marnock W109 - Reinstating a Shut-In Well - Lara Winstone, BP |
| 09:55 | Improving Intervention Efficiency with a Novel Downhole X-ray Diagnostic Service - Melissa Spannuth, Visuray |
| 10:20 | New composite rod intervention system for electrical, electro-mechanical, and mechanical services - Duncan Troup, Archer |
| 10:45 | REFRESHMENTS AND NETWORKING IN BOYD ORR EXHIBITION HALL |
| 11:15 | Oil & Gas UK Reservoir & Wells Optimisation Special Interest Group, Ross Dornan, Oil and Gas UK |
| 11:40 | A New Electric Line Downhole Jetting Tool Accomplishes Sample Collection and Screen Clean-out to Restore Production - Andy Jessiman, Welltec |
| 12:05 | TECHNOLOGY SHOWCASE: Using Unmotorized Desander to Increase Efficiency of Well Clean-up Operations - Anders Arefjord, Fourphase Behind Pipe Production Logging (SNL-PLT) - Assessing Completion and Reservoir Performance - Remke Ellis, TGT Oil Visual Reality - using Dimensioned Video Images to Enhance Wellbore Diagnostics - Glyn Roberts, EV Offshore Gaining access to challenging wellbores for intervention or abandonment - Greg Venus, TAM International Wire Condition Monitoring System - Andrew Douglas, NOV Elmar |
| 12:35 | LUNCH, NETWORKING IN BOYD ORR EXHIBITION HALL |
| 13:35 | MacCulloch LWIV Campaign - Henry Oliphant, ConocoPhillips |
| 14:00 | Challenges of Global Deepwater Intervention Operations and Benefits of Motion Compensation - Trey Miller, NOV |
| 14:25 | Electric-Line Deployed Lightweight Intervention Technology For The Effective Removal of Barium Sulphate Scale Obstructions From Small Diameter Wellbores - Masa Brankovic, Qinterra |
| 14:50 | REFRESHMENTS AND NETWORKING IN BOYD ORR EXHIBITION HALL |
| 15:15 | Opportunity in Adversity: Economic and innovative well stimulation unlocking value in the North Sea - Asif Hoq, BP |
| 15:40 | A Unique collaborative investment deal to unlock more hydrocarbons in the North Sea - Steve Coxhill, BP |
| 16:05 | PANEL SESSION |
| 16:30 | CLOSING REMARKS |
