

# UKCS Oil and Gas Decarbonisation

**Electrification and INTOG**

**CERULEAN  
WINDS**

# Introduction to Cerulean Winds

Cerulean Winds generate **green electrons** and **green molecules** and deliver them directly to the industrial user to cut carbon emissions

# UK Policy, regulatory & Governmental

## North Sea Transition Deal

# UKCS Energy Transition industry needs/principles of solution

## Basin-wide approach

- Current user
- Planned development
- Future development

## High availability of 100% green power

- Meet the Govt Emissions Targets

## Electrify ASAP

(minimised brownfield modifications/turnaround, online by 2027)

## Affordable electricity for Industrial users

## Pay through use

(No Capex contribution to green energy system)

## Delivery Certainty

(Streamlined consenting & permitting process through site selection)

# Cerulean Scheme

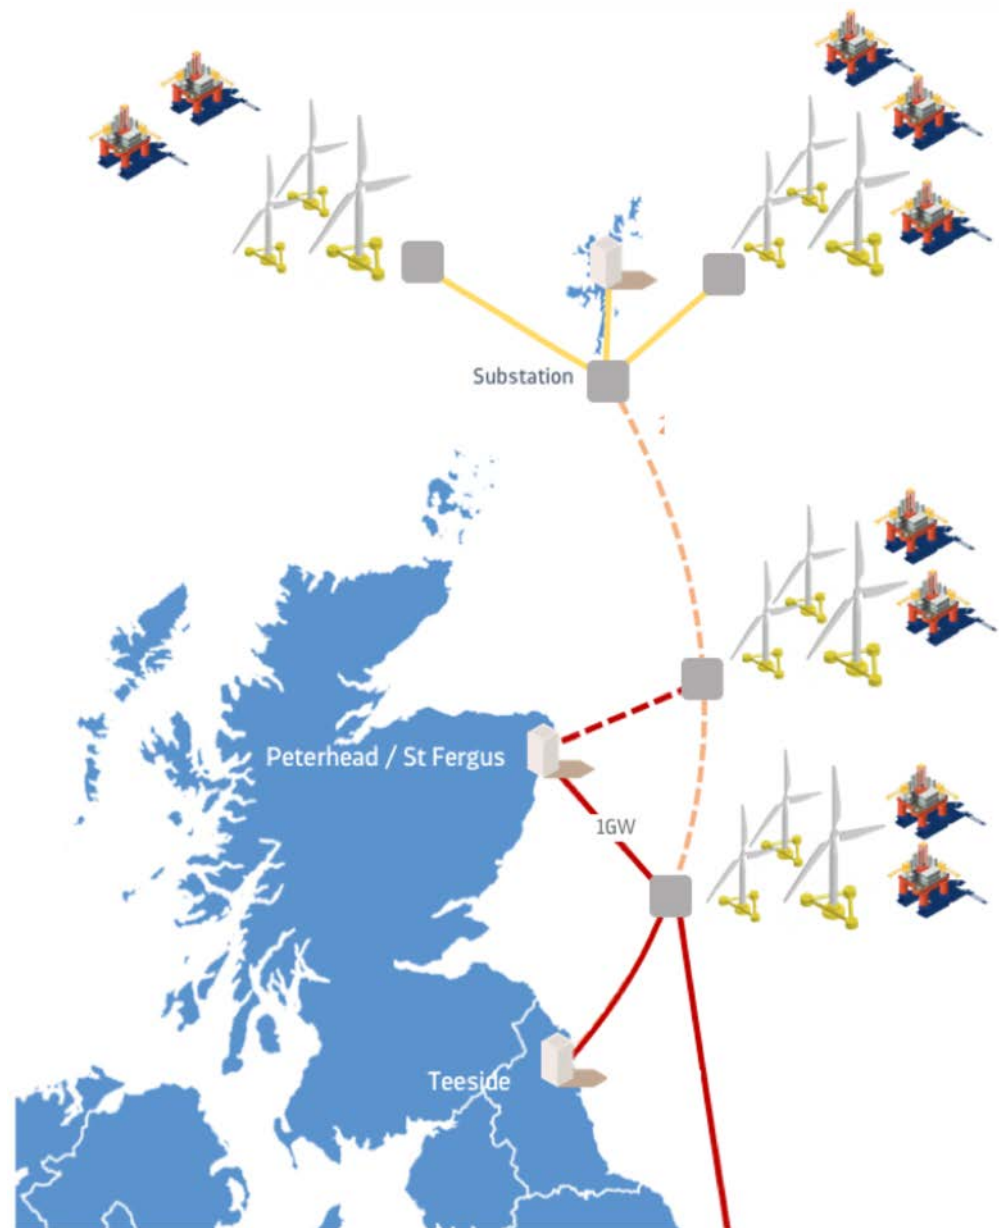

Scale

Brownfield Works

Excess Energy

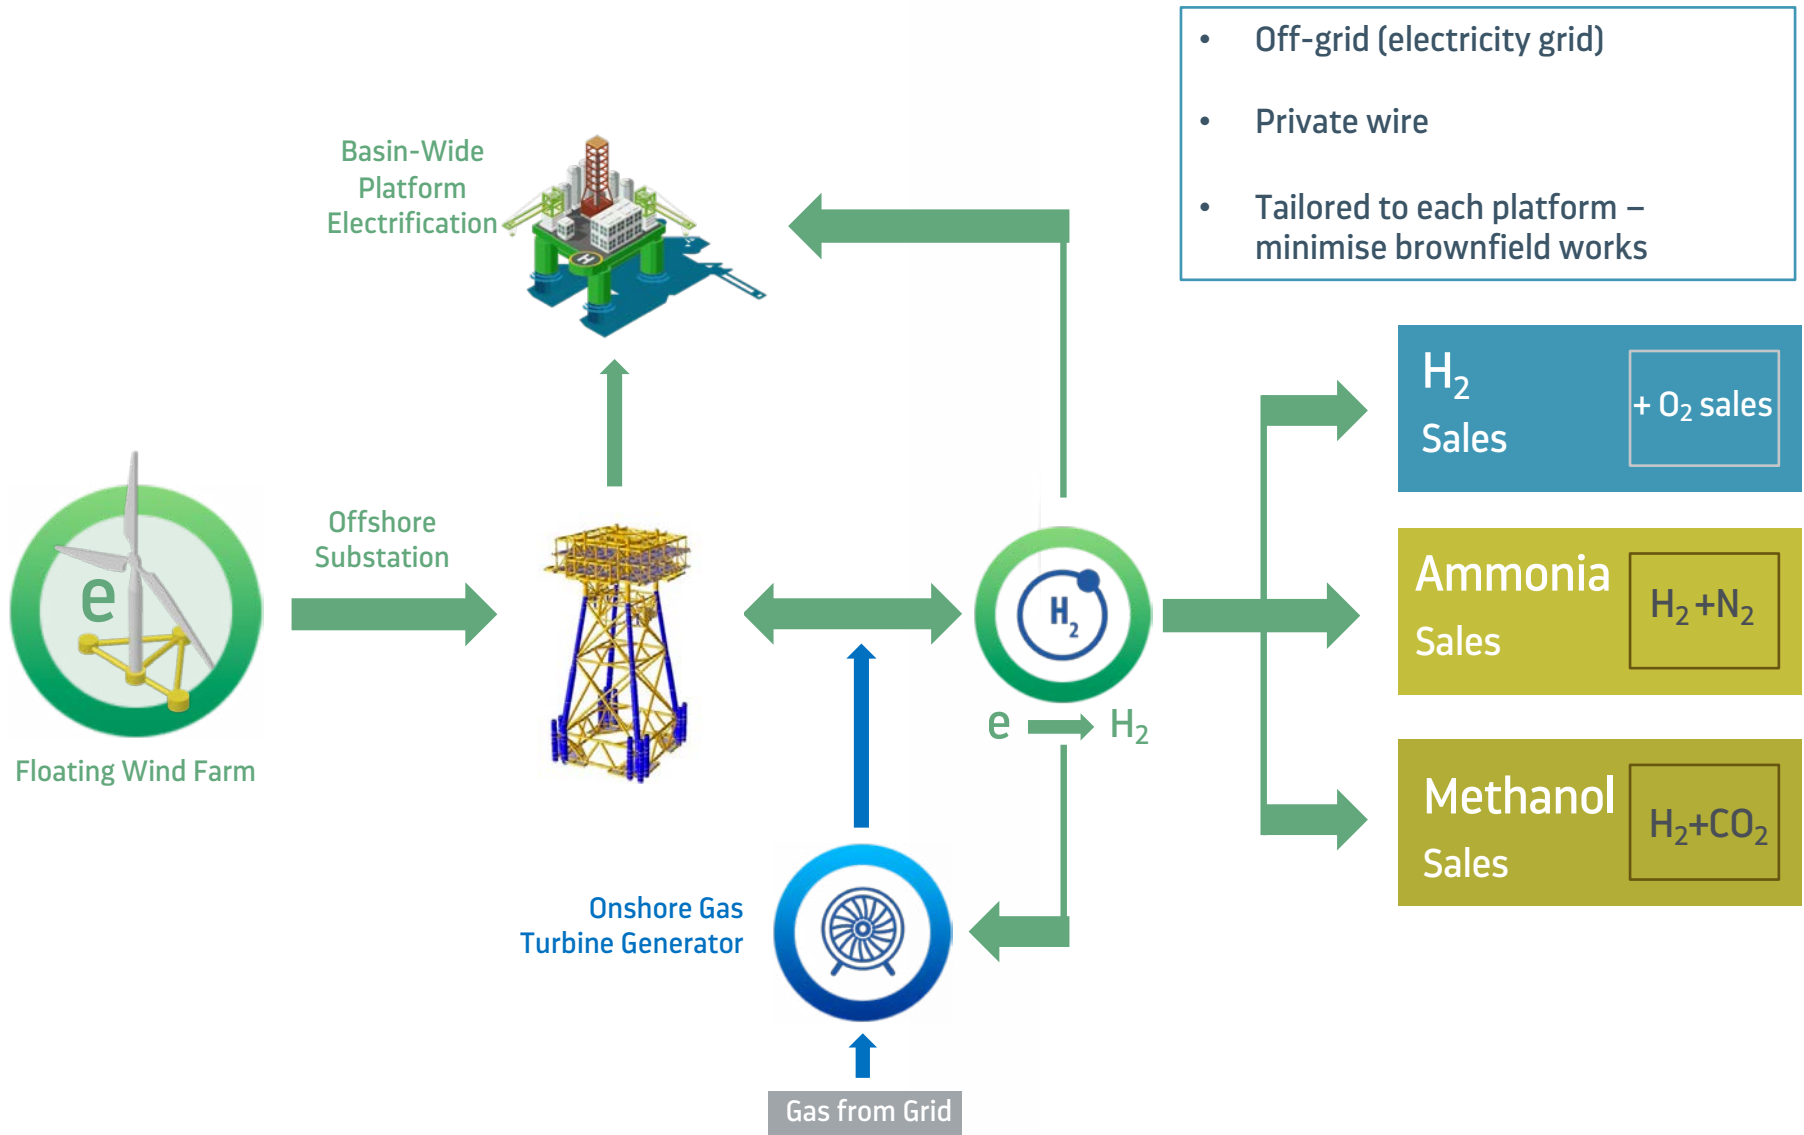

Transmission

Carbon Capture

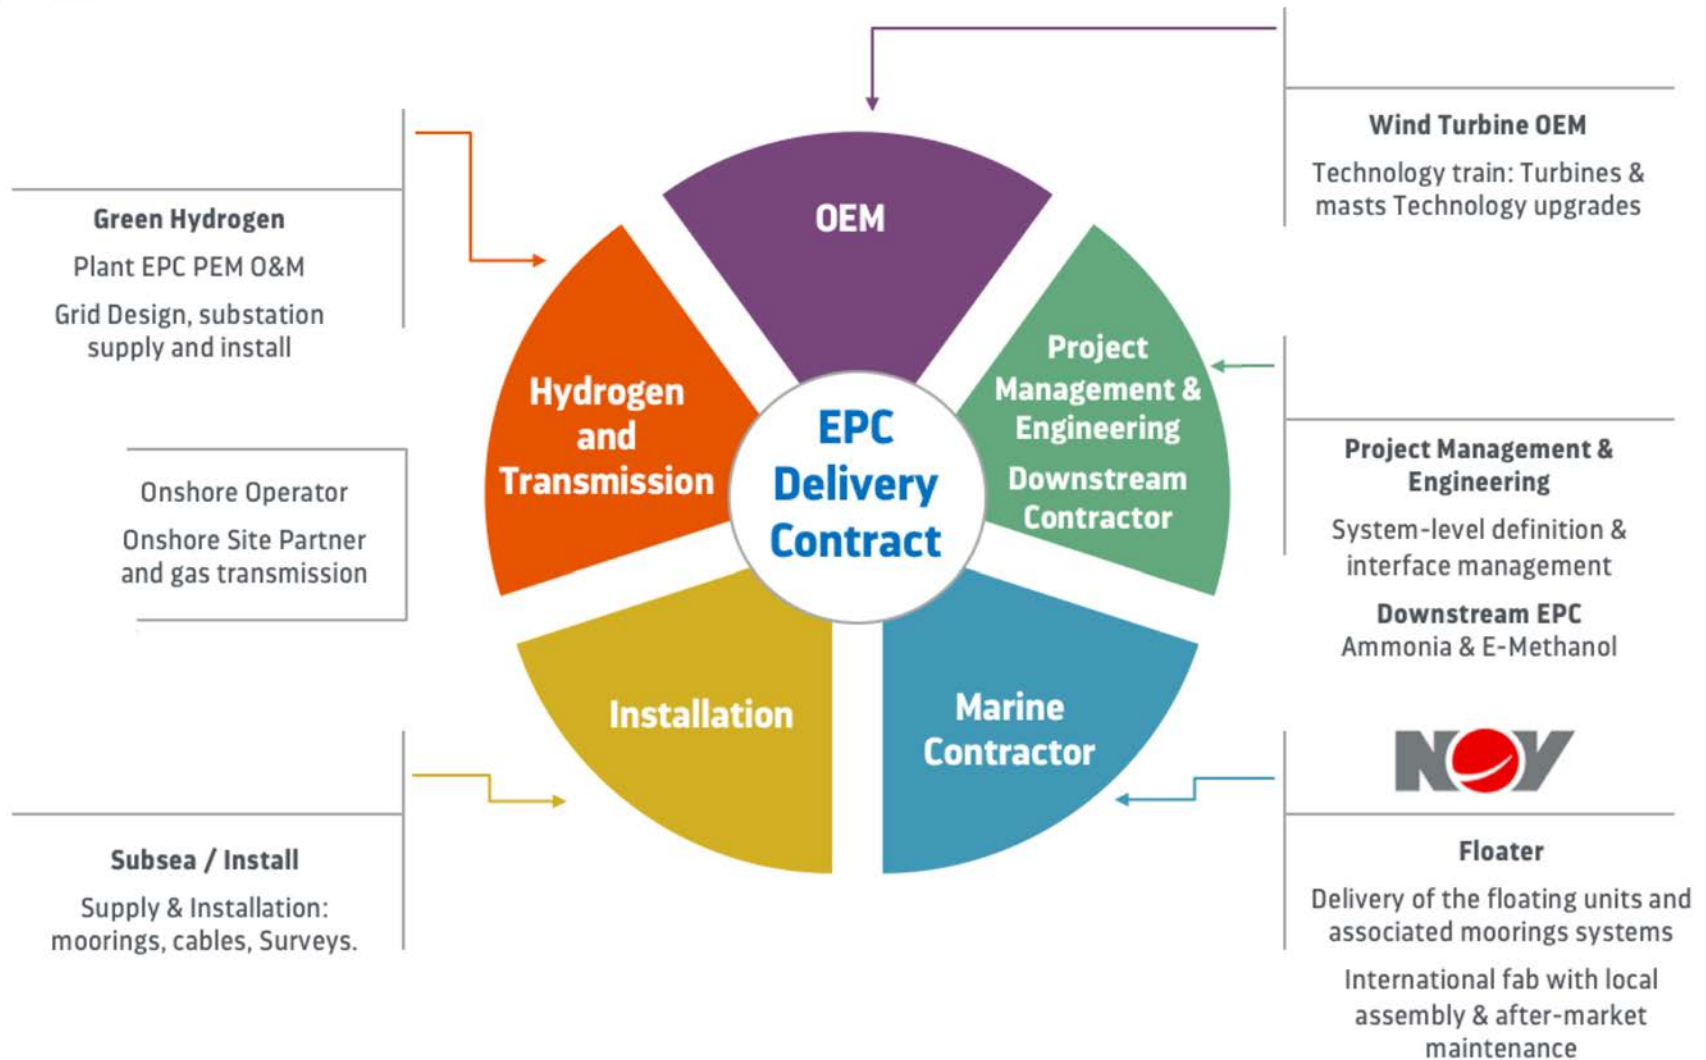

# Delivering what the UKCS Energy Transition needs

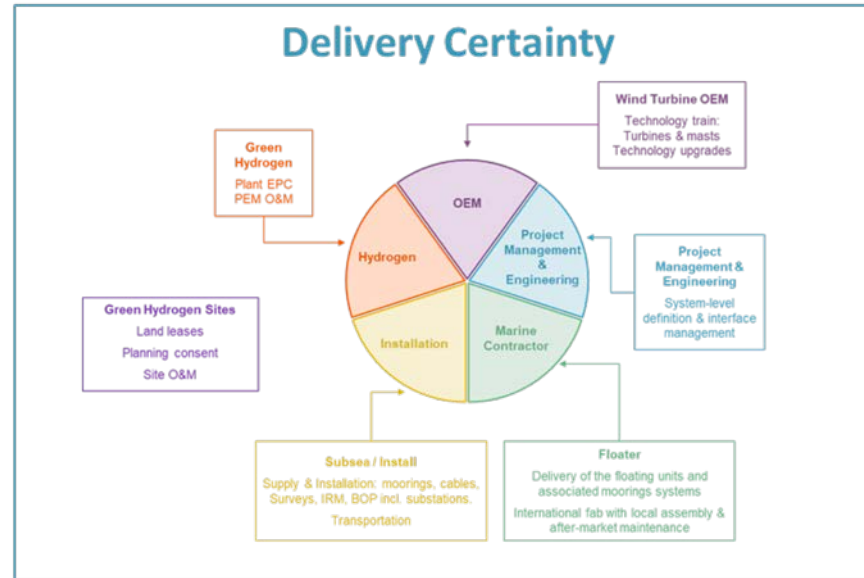

# Exclusive Contractor Consortium

# Project Readiness & Local Supply Chain

## Supply Chain Engagement

## Market Finance

# Local Content Example – Assembly Works

# Thank you
